

Nursing Program Outcomes

The Nursing Faculty have set purposes and outcomes for the Nursing Students. This provides us with a clear way to measure the success of our program. As a Nursing Student you will notice that your courses are aimed toward these purposes and that your performance is measured against these purposes throughout the program. As you read these statements you might find it interesting and encouraging to think of the tremendous growth you will experience on your way to becoming a nurse.

Outcomes:

EPSLO #1

Integrates the nursing process in the delivery of patient centered care.

EPSLO #2

Integrates clinical reasoning skills in the delivery of patient-centered care.

EPSLO #3

Adapts effective communication within the context of the healthcare environment.

EPSLO #4

Integrates legal and ethical codes within the nursing role.

EPSLO #5

Creates a caring and professional environment inclusive of the patient's cultural and societal beliefs and practices.

EPSLO #6

Utilizes scientific and evidence-based knowledge to guide actions, which promote patient-centered care.

EPSLO #7

Utilizes technology to find, analyze, and apply evidence-based information and current resources.
